The Rust Factor™ Soaking Rust Remover: Everything you want in a rust remover

- pH neutral
- Safely removes all rust including ancient rust
- Works at room temperature
- No scrubbing needed
- No harsh chemicals or acids
- No neutralization needed
- Non corrosive / Non toxic
- Removes white rust from zinc
- Removes tarnish from and brightens copper, brass and bronze
- Biodegradable

The Rust Factor™ Soaking Rust Remover, easily removes rust and corrosion from all ferrous metals and does not damage non-rusty areas. It does not harm aluminum, brass, copper, titanium, solder, wood, rubber, vinyl or glass.

Works anywhere rust is a problem

THE RUST*FACTOR
SOAKING RUST REMOVER

Safe rust removal made easy: Soak it, rinse it, use it

Seeing is believing. Take a look at these items, all safely de-rusted by THE RUST FACTOR.

Above, before and after wheel cover restoration, front side; below, the back side

After restoration, these rust-frozen bolt cutters now work like new

THE RUST FACTOR restored this saw and did not harm the wood

Mower blade ready to use

THE RUST FACTOR restored this family heirloom and removed scale from the enameled surface

The Rust Factor affects rusted metal only and is safe to use on painted items
